

From: Cal Poly Initiative for Climate Leadership and Resilience , San Luis Obispo, **to:** California Polytechnic State University , San Luis Obispo.

Sign on to support regenerative agriculture through Cal Poly food services. We are proposing to allow for small (1%) **optional** donations to be collected when purchasing food at campus markets, catering, or meal plans. This money will be disbursed as grants to fund farmers who are transitioning to climate-smart agricultural practices. The cost to campus is essentially \$0, and no one is required to contribute; it is optional. A 1% donation is very small - a \$25 purchase would generate only \$0.25. Nonetheless, this program could easily generate over \$300,000 annually to support an important climate solution, help local farmers, make our food system more resilient, and advance Cal Poly's climate goals.
